ASIST is designed to help all caregivers become more willing, ready and able to help persons at risk. Just as "CPR" skills make physical first aid possible, training in suicide intervention develops the skills used in suicide first aid. ASIST is a two-day intensive, interactive and practice-dominated course designed to help caregivers recognize risk and learn how to intervene to prevent the immediate risk of suicide.

This workshop is for all caregivers. It is suitable for mental health professionals, nurses, physicians, pharmacists, teachers, counselors, youth workers, police and correctional staff, school support staff, clergy, and community volunteers. If you interact with people this training is for you!

Training is being offered at a reduced rate! Early Registration is \$79.00 until May 15, 2011 after this date the cost will be \$99.00. Call our office to register as space is limited!
